

Supply Chain Integration. Business Acceleration.

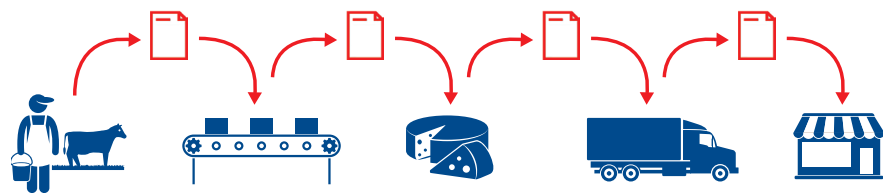

Our automation software makes your supply chain a competitive asset.

We've been delivering proven solutions for the restaurant industry since 1999. Our platform, SCA Planner™, is the industry's only integrated, end-to-end automation platform for procurement, supply chain, finance teams, and suppliers. SCA Planner manages billions of dollars in annual spend and saves hundreds of millions of dollars for customers by reducing variance accounts, promoting margin and increasing cash flow.

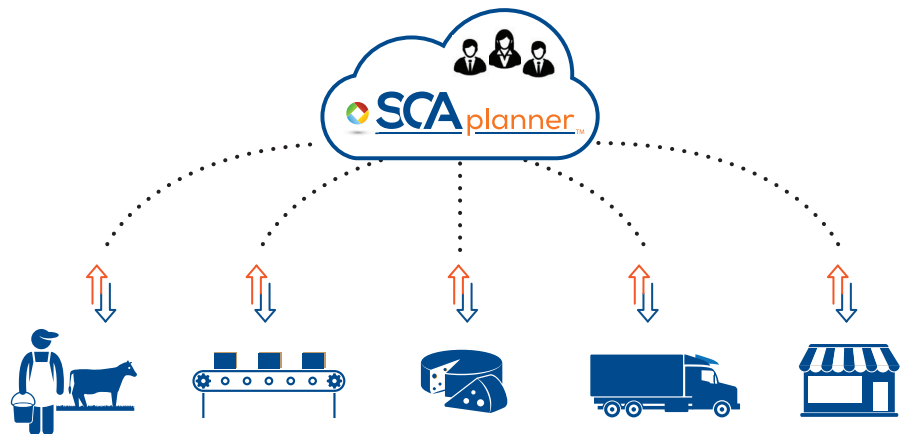

SCA Planner results

- Increased savings, margin and cash flow
- Reduced sourcing events from months to weeks/days
- Reduced variance balance by a factor of 5
- More positive brand/franchisee relationships
- Elevate team performance

Today's supply chain: shackled by fragmented, manual information flow

Siloed, non-collaborative category supply planning, forecasting and cost/margin management with inefficient and inaccurate data communications across the value chain result in lost market opportunities.

SCA Planner integrates your supply chain to accelerate your business

SCA Planner provides an integrated, digital platform for procurement, supply chain, finance teams and suppliers that delivers next-generation performance through collaborative, real-time visibility in projections and planning.

Who we serve

SCA Planner accelerates every part of your supply chain.

SCA Planner Solution Stack

Benefits

	ACTUALS TRUE-UP SUPPLIER MANAGEMENT	CATEGORY PLANNING	PURCHASE PRICE APPROVALS	COMMODITY RISK MANAGEMENT	COGS FORECAST PRICE MANAGEMENT	FREIGHT	LOGISTICS INFORMATION MANAGEMENT	SOURCING EVENTS	PROPOSAL SOURCING	SUPPLY PLANNING	VENDOR-CUSTOMER CONTRACTS	INSIGHTS	API INTEGRATION
Cost Savings
